Masters in International Business (Distinction)
BSc Computer Science (Software Dev.)

PROFILE

A graduate with a Bachelor of Computer Science and Masters in International Business from the University of Wollongong, with a focus on software development.

Key achievements include:

- Built the frontend of a web application called "Plan Your Own Funeral" as a final year project in software development utilising tools such as Vanilla JS, SCSS, and HTML. The application assists users to document and define particulars to be shown during their funeral. The resulting application delighted our client, ExSitu, a health care provider.

- Built upon an existing web application with Moth Diagnostics utilising ReactJS as the frontend and Java/Spring as the backend of the application to refine and develop new functions. This was part of a project during my traineeship with _nology.io.

- Achieved an average grade of "Distinction" for the required coursework for a Masters in International Business whilst studying, working part-time, and being actively involved as the Vice President for the Malaysian Association for Students.

KEY SKILLS

- Problem solving and logical thinking
- Proficiency in programming languages – JavaScript, HTML, SCSS, Java, C++, SQL

- Accuracy and attention to detail
- Organisational and time management skills
